EXECUTIVE SUMMARY

Computer Science Engineering student with practical experience in Python development and full-stack web projects. Strong in analytical thinking, communication, and leadership, with a commitment to continuous learning and professional growth. Looking to leverage my technical expertise with teamwork, adaptability, and initiative in a dynamic work environment.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science

Adhiparasakthi Engineering College | 2022 – Present

- CGPA: 8.7

Secondary & Higher Secondary Education

St. Joseph Higher Secondary School

- Higher Secondary Certificate (HSC): Passed in 2022 (79%)
 - Secondary School Certificate: Passed in 2020 (82%)
-

SKILLS

- **Programming Language:** Python, JavaScript.
 - **Web Development:** MERN Stack, HTML, CSS.
 - **Database:** SQL, MongoDB.
 - **Core Concepts:** AI/ML, Networking.
 - **Tools & Platforms:** VScode, GitHub.
 - **Soft Skills :** Teamwork, Critical Thinking, Communication, Adaptability.
-

EXPERIENCE

Python Full Stack Web Development Intern - VEI Technologies

- Worked on developing and maintaining web applications using Python backend and responsive frontend technologies.
- Gained hands-on experience in full-stack web development using Python, Flask, Django, and SQL.
- Gained hands-on experience with user authentication, session management, and full-stack deployment.

MERN Stack Web Development Intern - Edunet Foundations

- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Implemented authentication, API integration, and database management.
- Collaborated with a team using Git/GitHub for version control.

CERTIFICATIONS & TRAINING

- Python Programming
- Artificial Intelligence and Machine Learning
- Web Development
- Networking
- Cyber Security

PROJECTS

Soil Nutrient Analysis Using NPK Sensor

- Created an Arduino-based system to measure soil nutrients.
- Integrated the system with an app for interactive Management.
- Utilized data-driven insights to enhance precision farming.

Recipe Sharing Platform

- Developed a full-stack web application for users to share and browse recipes.
 - Implemented MongoDB database for storing recipes, user profiles, and comments.
 - Designed a responsive and interactive frontend using React, with authentication and CRUD functionality.
-

CRM Application for Mall Management

- Project Leader: Led the design and development of a customer relationship management system.
- Focused on improving user engagement and analytics reporting.
- Developed custom Apex triggers and classes to calculate and automate the Tenant Health Score.

Chess Game Reviewer

- Developed a full-stack web application using Python/Flask to analyze chess games uploaded via PGN/FEN.
- Combined the world-class analysis capability of Stockfish with an intuitive, web-based user interface.
- Created Chessboard and Evaluation Table that visually represents the game's score in as the user navigates moves.

Realtime Hand Gesture Detector

- Engineered a Real-Time Hand Gesture Recognition pipeline using Python, TensorFlow, and OpenCV for live webcam prediction.
- Trained and optimized a CNN model (Keras) for robust classification, applying Data Augmentation and Early Stopping to prevent overfitting.
- Utilized MediaPipe for robust data acquisition and landmark detection, enabling the creation of a high-quality, labeled dataset for six distinct gestures.

LANGUAGES

- Tamil (Native)
 - English (Proficient)
-
